

SCADA Engineer – Buffalo, NY

National Fuel is currently seeking a SCADA Engineer for an outstanding career opportunity in the **Gas Supply** department located at our distribution center in West Seneca, NY. National Fuel is proud to have an inclusive workplace where hard work is rewarded and promotion from within is supported. We offer exciting career opportunities for talented and ambitious job seekers and encourage you to apply today.

PRIMARY RESPONSIBILITIES:

Position will work in a team environment to ensure that the NFG SCADA system is operable by the Gas Control Department on a 24/7 basis throughout the year. The NFG SCADA system is utilized for the remote monitoring and control of field facility equipment, including compression, flow control, pressure control, valves and various telemetry. Over time this position will be required to learn and provide support for responsibilities of the SCADA Engineering Team, including:

- Provide technical support of the AVEVA OASyS SCADA system and hardware, including maintenance of HMI displays, hardware troubleshooting, configuration of new facility telemetry and controls, evaluation of alternative communication options, testing and emergency support
- Program and trouble shoot PLCs and RTUs used across our remote field locations.
- Coordinate activities among SCADA, Electrical and Operations departments for new equipment installation projects, replacement equipment installation projects and troubleshooting existing equipment.
- Evaluate, configure, test and implement alternative technologies as applicable to the SCADA system. This includes selection and performing proof of concept testing for hardware and software functionality.
- Document SCADA system operations, maintenance, issues observed and resolution of issues.
- Support Gas Control Department and other department/corporate users of the SCADA system. This includes supporting reports, data requests and SCADA access security.
- Provide technical support to ensure the reliable operation of the Gas Measurement field data collection system hardware and software.
- Position will have opportunity to and requires collaborating with and supporting several departments across the company. These departments include Gas Control Operations, Engineering Services, Compression Services, Electrical and Automation Services, Measurement-Regulation-and-Control (MRO), IT and Gas Measurement.

MINIMUM QUALIFICATIONS:

- Bachelors in a relevant engineering discipline
- Experience and/or course work related to control systems
- Experience and/or course work related to programming
- Ability to produce well written and easily understood documentation

PREFERRED QUALIFICATIONS:

- Bachelors in Electrical Engineering
- In addition to Engineering experience, IT experience a plus.
- Experience with SCADA or industrial control systems (AVEVA OASyS product preferred)
- Experience with PLC programming and hardware (Emerson Remote Automation Solutions ControlWave Micro devices preferred)
- Experience with Visual Basic, communications technologies (satellite, radio, cellular), and/or Microsoft SQL queries and databases
- Cyber security training/certifications
