

Resume 1050

OBJECTIVE:

Highly motivated, dedicated, and results-driven professional to secure a position with your company as a ***Manager, Supervisor, or other position as a Production/Assembly Specialist, Warehouse Associate, Part Time Security Guard or other position as applicable***, utilizing my extensive skills, training, and experience

SUMMARY of QUALIFICATIONS:

- Over 5 years' experience as a manager in the production, fiberglass insulation/sleeving industry, supervising up to 30 machine operators, and proficient with all aspects of workforce development including interviewing, hiring, training, delegating work orders, monitoring all work activities for quality, expediency, and safety, conducting performance evaluations, implementing disciplinary measures, and terminations
- Over 15 years' experience as a Machine Operator in a production and warehouse setting manufacturing fiberglass insulation sleeving for the electrical wiring industry and compliant to all OSHA safety rules and regulations, as well as Lock-Out/Tag-Out and confined space protocols and procedures
- Experienced and responsible for inventory management and submitting detailed reports to administrative staff, also performing quality control inspections on finished products and approving quality products or rejecting substandard products, informing management accordingly
- Operates forklifts, pallet jacks, overhead cranes, scissor lifts, jack hammers, and most hand/power tools
- Multi-tasks effectively, learns new systems quickly, and completes all projects on or ahead of critical deadlines
- Familiar using computers, Windows, Internet research, and email

PROFESSIONAL EXPERIENCE:

09/2017 – 06/2026 ***Chemical Reaction Operator***

Goodyear Chemical Plant, Niagara Falls, NY

- Monitored and controlled chemical reactor operations from a centralized control room, ensuring safe and efficient production processes.
- Regulated operating conditions including temperature, pressure, flow rates, and equipment speeds to maintain reaction stability and meet production specifications.
- Continuously monitored instrumentation, gauges, and control systems to identify and respond to operational deviations.
- Collected & analyzed product & process samples to verify quality standards & ensure compliance with parameters.
- Maintained detailed operational logs, including pressure runs, process readings, equipment performance data, and production records.
- Performed routine process adjustments to optimize production efficiency, product quality, and system reliability.
- Collaborated with maintenance, quality control, & production personnel to troubleshoot issues & minimize downtime.
- Adhered to strict safety, environmental, and regulatory procedures while handling hazardous chemical processes and equipment.

11/2008 – 11/2016 ***Machine Operator / Supervisor***

Delfingen, Inc., Niagara Falls, NY

- Operated a machine to process braided fiberglass insulation sleeving from a tower, coating the insulation with various latex paint colors (depending on the run) which passed through several ovens to bake on the coatings
- Selected as supervisor for 5 years to resolve a transitional corporate production management period, supervising up to 30 machine operators, conducting pre-work meetings, distributing assignments, setting production goals, and continually monitoring all production runs to ensure quality and the attainment of quotas
- Responsible for all phases of workforce development, from interviewing, hiring, and training, to implementing disciplinary measures and terminations
